Goal

To secure a graphic design or web development contract, where I can be an integral part of the creative team. I am looking to leverage my experience in pre-press; Information Technology, systems and network support; graphic design; business process engineering; marketing understanding, database design and implementation, programming, web page creation and project management to a business desiring a wide range of experience and expertise.

Qualifications

- Understanding and experience in Graphic Design using InDesign, Illustrator, Photoshop, Quark, PageMaker, Canvas, CorelDraw, Acrobat, FrontPage, Dreamweaver 8, Swish Max, ProShow Producer, Microsoft Office, Publisher, PitStop Pro, Quite Imposing Plus and other graphic design related programs.
- Extensive experience configuring and using RIP software, including Xitron Navigator, Onyx, Colorburst, and EFI Fiery
- Understanding and experience in digital/film photography, scanning, retouching, compositing, color correction, and color management.
- Extensive understanding and experience in print production including CMYK, spot color, separations, screening, pre-flighting, font management, asset management, color space management, imposition, PDF workflow and color calibration.
- Extensive experience in information technology, including application and systems level programming; web site design; database design and implemetation; security; systems and network management; disaster planning and recovery; and desktop and server support.
- Experience and understanding in HTML coding, Web page design and layout, Javascript, PHP, and some MySQL.

Pertinent Employment History

- 3+ years doing Pre-press, imposition, color correction, RIP operation, graphic design, wide format printing, layout, color calibration, quoting, and sign production.
- 1 year doing web page creation
- 5 years employed at The Boston Globe IT Department, supporting print production, archiving, editorial graphic arts, circulation graphic arts, photography, editorial communications, and enterprise system networking and management.
- 3 years employed at Saga Holidays, supporting graphic art department; developing decision support systems and tour tracking database system; and network integration.
- 3 years employed at ON Technology, managing IT department, supporting graphic art department, developing web presence and designing corporate web site.
- 10 years contract support of graphic artists; technical support; department and project management; server and network management; process improvement; database design; and IT strategic and tactical planning.
- 3 years cumulative experience in graphic design and photography for various firms.
